Memorandum To: Karen Janney, Ed.D.
Memorandum From: Joe Fulcher, Ph.D.
Date: December 18, 2015
Subject: Computer Upgrades (Learning Centers and Computer Science Classes)

At a recent Board meeting, Trustees reported that staff from Sweetwater High School had recently voiced concerns about the poor condition of the computers in their computer science classes. The board of Trustees also referenced an email from Sweetwater High School's Learning Center staff regarding the lack of functioning computers for their students. With regard to Learning Center computer upgrades, resources have been identified in the Alternative Education budget to partially fund the projected improvements. Over the next few weeks, Alternative Education officials/staff will assess current inventory in all Learning Centers to generate a site priority list and 3-4 centers with the greatest needs will receive the initial upgrades. The remaining Learning Centers will receive computer upgrades over the next two years as funds will be budgeted for this purpose.

Please expect an update on infrastructure and hardware (i.e., computers) needs for our computer science classes on the next Friday report (David Damico will provide).
